DETAILED ACTION

1. The amendment filed September 24, 2001 has been entered. It is noted that in view of the new amendment practice under 37 CFR 1.121 which became mandatory for all amendments on March 1, 2001, and due to the limited amount of examining time per application, if the amendment contains changes to existing language that requires a marked-up version showing those changes, the Examiner is relying upon the marked-up version(s) for examination of the application. It is applicant's responsibility to ensure that the clean version(s) is (are) the same as the marked-up version(s). It is further noted that the clean version(s) is (are) considered to be the Official version(s).

Drawings

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on September 24, 2001 have been **approved**.

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "means for rotating said cutting cylinder and said transfer cylinder" as set forth in claim 5, and the "means for rotating said transfer cylinder" as set forth in claim 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Claim Rejections - 35 USC § 112

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, [✓]“cutting cylinder” is vague and indefinite and appears to be inaccurate because the disclosed feature is not cylindrical, and thus the scope of the limitation using this term cannot be ascertained, and it is suggested to change “cutting cylinder” to --rotary cutter-- or the like.

In claim 4, lines 2-3, the recitation “each connected to” renders the claim vague and ← indefinite, particularly since it seems that the gripper and tucking blade are each part of the transfer cylinder and it's not clear how they can be both part of and connected to the transfer cylinder.

In claim 5, line 5, [✓]“means for rotating” is vague and indefinite as to what disclosed structure it refers.

In claim 6, ^xline 2, “means for rotating” is vague and indefinite as to what disclosed structure it refers.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, as understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Barber, pn 2,222,279.

7. Claims 1, 3, 5 and 6, as understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Elsner et al., pn 5,363,728.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark Dexter whose telephone number is (703) 308-1404. The examiner's typical work schedule is Monday, Tuesday, Thursday and Friday, and he can be reached during normal business hours on these days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Allan Shoap, can be reached at (703)308-1082.
